

Weigh Shark® Scale Calibration Weight Set.

Calibration Weights at your Scale!!

- **SAVE TIME:** No longer do you have to carry the test bar and weights to the scale.
- **INCREASE SAFETY:** No longer do you have to climb on the belt to secure the weights on the opposite side of the belt.

Bolt the calibration weight bracket to your scale idler using provided Tri-Fold bolts. Zero the bracket weight off during the ZERO Test. Hang the calibration weights onto the bracket during the SPAN Test. Remove the weights and store them on angle iron located at the scale (customer provided).

Set Includes:

- * **Mounting Bracket w/ Tri-Fold Mounting Bolts**
- * **Eight 16# Powder Coated Calibration Weights**
- * **Price: Call for Details**
